

INTERIOR COLOUR guidebook

**NEROLAC
PAINT+**

For over 100 years, Nerolac has been touching lives, in ways you wouldn't have imagined. We've made sure to be present in lives of our customers in more ways than one. From connecting people, protecting and maintaining mighty bridges and dams, adding sheen and beauty to India's first modern day car, the iconic Maruti Suzuki 800, to ushering in an era of healthy home paints with low VOC and no heavy metals, bringing beauty and durability to not just walls but also vehicles, homes appliances, furniture and more.

Through the years, we've been constantly innovating to stay ahead of the times. With our innovative product range, futuristic technology and services that have engaged customers and stakeholders alike. Our brand philosophy Paint+ is a testament to our commitment of providing world-class products that do more. The "+" in the name represents our promise of offering products and services that go beyond and deliver consumer benefits. This philosophy guides our product innovations.

With our legacy of 100 years and our Japanese expertise, we are confident of raising the bar in excelling and exceeding our customer's expectations.

Your guide to colour combinations

Monochromatic

To build a single colour palette based on the lighter (tint) or darker (tone) of a single colour, choose any shade, tint, or tone of that colour, for example reds-oranges (shade). Whites and greys can also be used for further visual appeal.

Triadic

Use three hues that are equally spaced out on the colour wheel, such as oranges, greens, and violets. Use one dominating colour and two subdued complementary colours to achieve the greatest effects.

Complementary

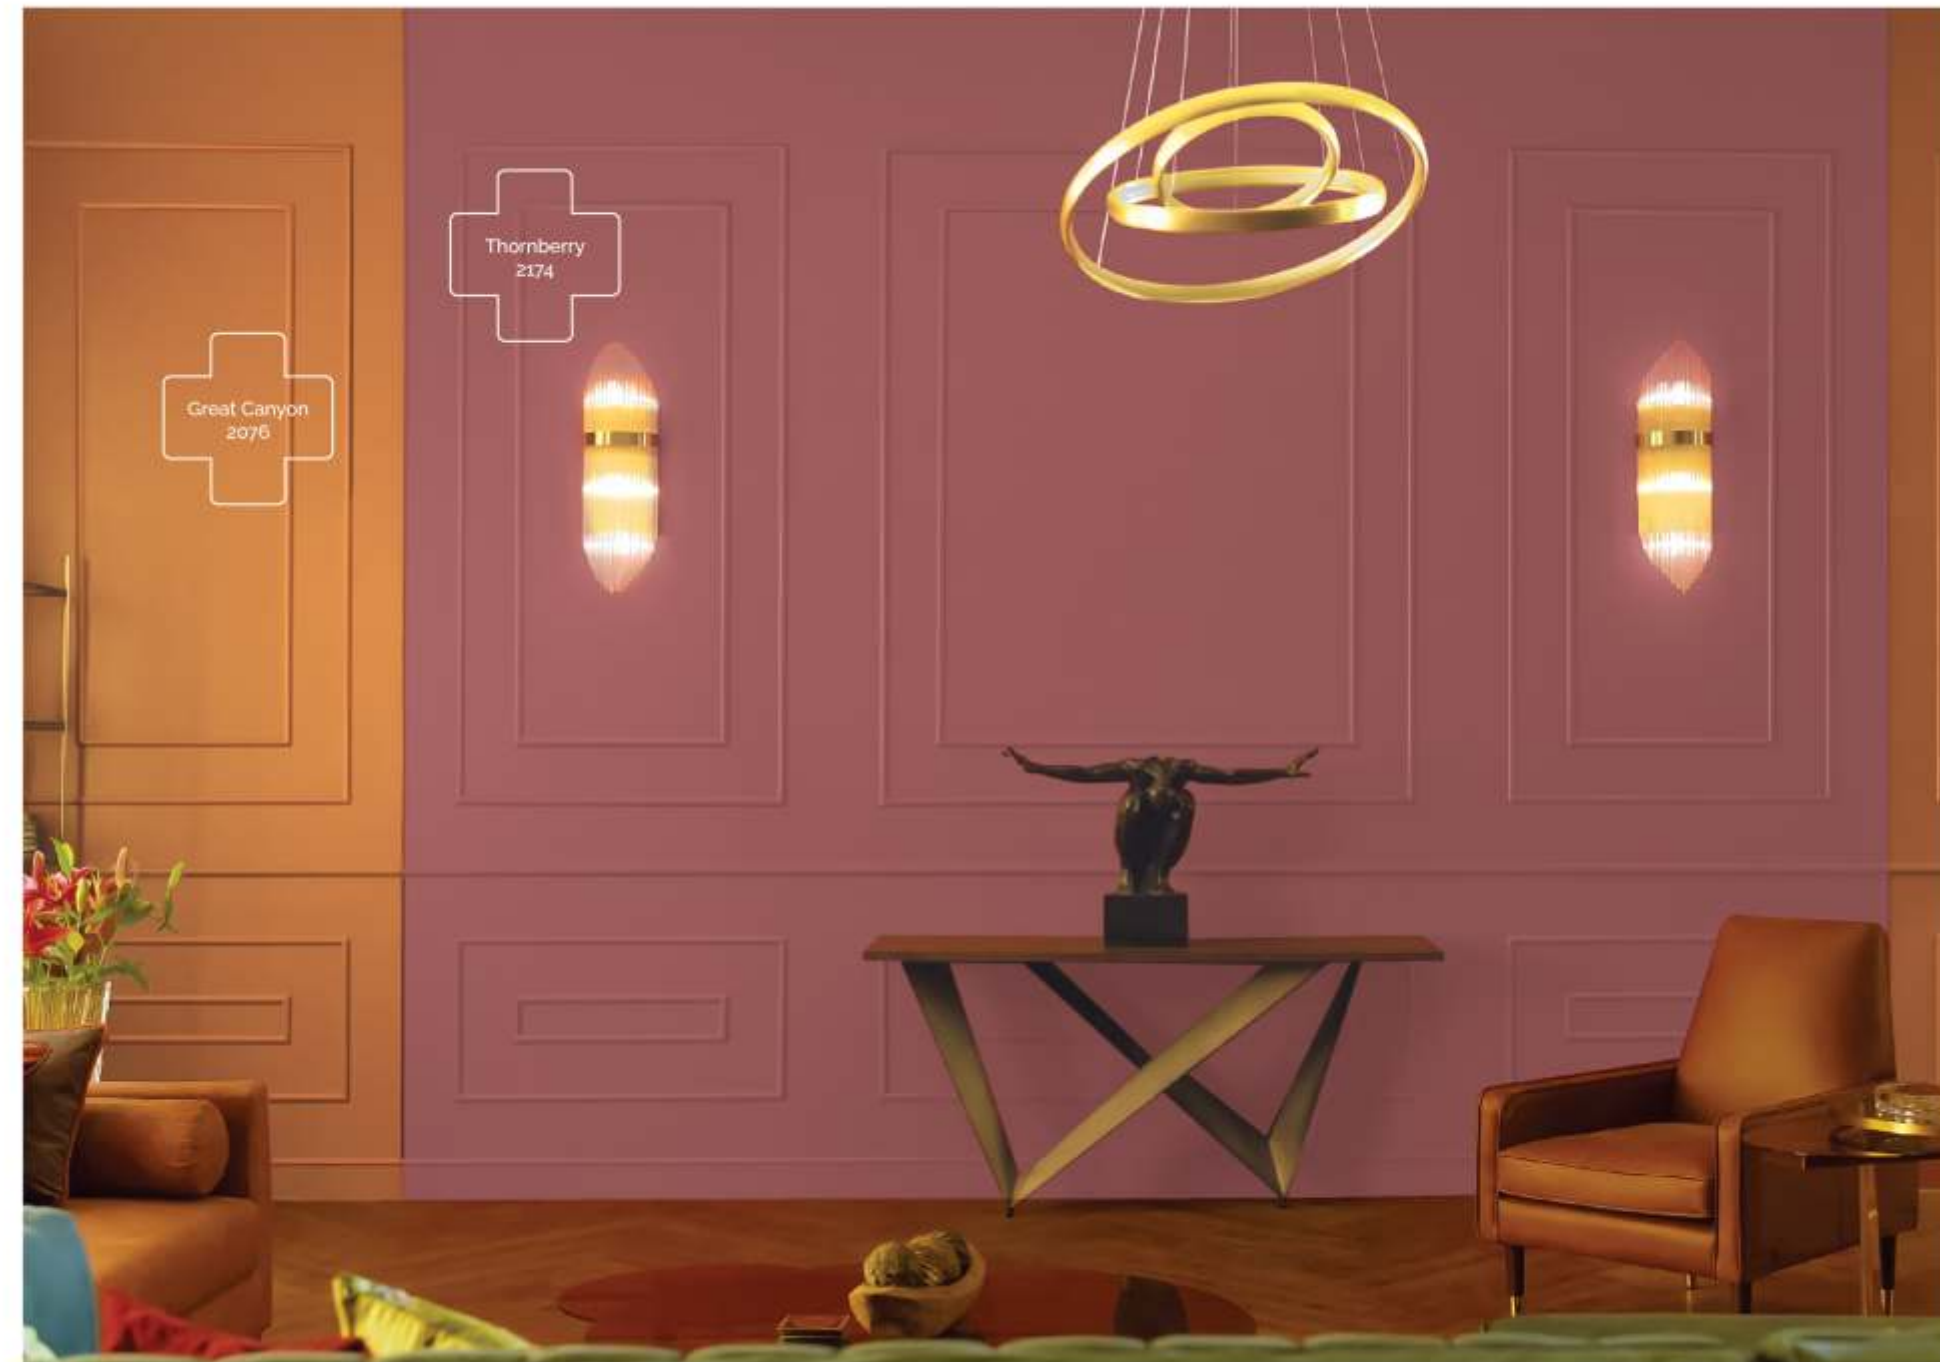

As the primary colours of your colour scheme, pick two hues that sit opposite one another on the colour wheel, such as purple and yellow. Depending on the intensity of colour used, the outcome might be a vibrant mix that is brimming with energy.

Adjacent

Combine one or two tertiary colours with either a primary colour or a secondary colour. Pick two or three colours that are 90 degrees apart and adjacent to each other on the colour wheel. For example, mix blues with blue-greens and greens.
