| Designer Finish | Kansai Select Arabesque | The product does not need to be diluted; it is ready to use. | Brush | 1 coat | 4-5 hours |

ARABESQUE APPLICATION

- Apply Arabesque (chosen shade) with a brush in a crosshatch pattern to a surface of 1 to 1.5 m², let it dry for a short while then go over with empty brush to orient the microparticles and create a light-dark effect.
- Finally, smoothing it out with a trowel to accentuate this light-dark effect. Continue decorating the entire wall in the same manner.
- It is advisable to make a small test before executing the work.
- We also recommend mixing any different batches of product after colouring and before application.
- Kansai Nerolac Paints strongly recommends the use of its own **Kansai Select Texture Basecoat**, considering it to be the most suitable basecoat for enhancing both the aesthetic aspect and the compatibility of the products in the various application coats.
- In case this does not happen, Kansai Nerolac Paints is not responsible for any unsuccessful work.

TECHNICAL CHARACTERISTICS

| | |
|---------------------------------|---|
| PACKAGING | 1 Ltr |
| COVERAGE | 75-95 sq.ft/L/coat |
